

ATTACHMENT-2

Special instructions;

All bidding contractors should provide roofing panel installation details in their proposal packages. Installation of new panels must follow these requirements at a minimum:

Replace all roof panels that have completely rusted through.

- Replace corrugated roof panels with new panels.
- Replace old fasteners with new with rubber grommets attached.
- Apply small bead of polyurethane caulk and or sealant onto overlapping rib before panels are overlapped and fastened.

Typical view of overlap and fastener placement on corrugated roof and walls as well.
